**QUE LE  
PRIMARY EXAMINER**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The title of the invention has been changed to: "Spatial information detecting device using intensity-modulated light and a beat signal".

The following is an examiner's statement of reasons for allowance: The prior art fails to teach a spatial information detecting device, among other features, comprising: a photoelectric converter for generating an electrical output corresponding to received intensity modulated at a predetermined emission frequency from a space; a local oscillator circuit having a local oscillator signal with frequency different from the emission frequency; a sensitivity controller for mixing the local oscillator signal with the electrical output to frequency convert the electrical output into a beat signal having a frequency lower than the emission frequency; an integrator integrating the beat signal at a predetermined timing; and an analyzer for determining information about the space.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
